

This notice is to advise you that the Boise Airport will be closing Runway 10R/28L for approximately **45 days** scheduled to start approximately July 11, 2021. Taxiway B3 will be closed permanently as well as the portion of Taxiway F from Taxiway B to Runway 10R/28L. The remainder of Taxiway F will be usable without wingspan restrictions. Taxiway H will also be closed during the maintenance phase. There will be vehicles on the Center Access Road between the runways.

The specific reason for these closures is to facilitate removal, relocation and rehabilitating of various taxiways. Airport maintenance crews will be working diligently over these days to take care of other safety-related maintenance that must be accomplished. Please be advised that there may be temporary intersection crossings that may be unavailable during this time. These closures will be closely coordinated with Boise Air Traffic Control. If you plan on flying into Boise, please pay close attention to all NOTAMs and be sure you have the current ATIS.

Up to date information can be found on the Airport's PASSUR Dashboard and through the FAA's NOTAM system. As always, if you have any specific questions, Airport Operations can be reached 24/7 at (208) 972-8420.
